

Evan Parker, Water Quality Administrator April 4th, 2016 MountainTrue champions resilient forests, clean waters and healthy communities in Western North Carolina.

What we do

Focus on a core set of issues that have *high impact* on the *environmental health* and *longterm prosperity* of our region:

- Advocating sensible land use
- Restoring public forests
- Improving water quality
- Promoting clean energy
- Encouraging civic engagement

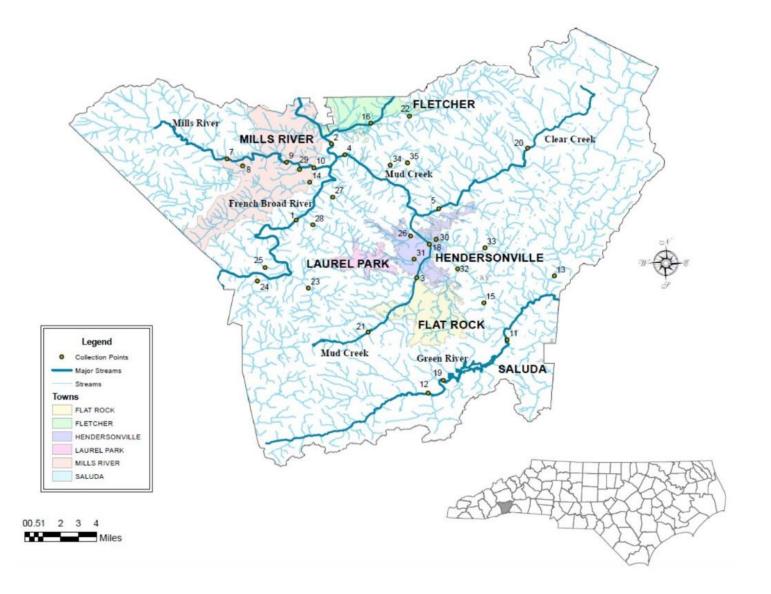

Volunteer Water Information Network (VWIN)

- Volunteer-based water quality monitoring program.
- 40 volunteers test 35 sites in all six Henderson County watersheds.
- Test for several parameters indicating pH, alkalinity, conductivity, nutrients, and sediment.
- 20 years of objective dataset.
- Allows MountainTrue and partners to identify streams facing degradation.
- Available for free to the public, municipalities.
- 2013-2014 VWIN Report.

Map of Henderson County VWIN Monitoring Sites

Mills River: Our Water Source

- Water source for Henderson County and parts of Buncombe County.
- Very good overall water quality, including the lowest nutrient levels in the County.
- The Mills River Partnership (MRP) utilizes VWIN data to monitor the overall water quality in the watershed
 - The MRP is an organization working with farmers on a voluntary basis to protect water resources.

Mills River Partnership

"I am elated to be working with the Mills River Partnership, they have been instrumental in helping me preserve topsoil" -Kirby Johnson, local farmer

Green River

- The most pristine stream in Henderson County, with some of the lowest sediment levels in the County.
- Help promote Green River as a major destination for kayakers, tubers, fishers, and other recreationalists.

Mud Creek

- Largest watershed in Henderson County, is well monitored with 4 sites on Mud Creek and 10 sites on 8 tributaries of Mud Creek.
- The Mud Creek Watershed continues to be one of the most degraded watersheds in Henderson County.
- MountainTrue is currently developing a watershed management plan for Mud Creek that will expand our current monitoring, log jam removals, trash cleanups, tree planting and more.
