SHARK BLUE

VENOM

**The Torque is the boat you
will choose 9 times out of 10
to go run the river and play
your brains out.**

We took the Hot Whip concept and tuned the play performance to a whole new level. Dropped chines and stern rocker make it carve harder, drive faster, and spin more loosely on a wave. We also dropped the bow volume enough to make it a cartwheel machine. But we didn't drop the bow rocker... much. That's the magic that makes this high performance long playboat also a great river runner.

You might not paddle another boat once you've given
this thing a little... Torque.
